

I understand that there is a movement to provide preference to LPFM stations. If you allow this, the current FM station that serves my local community will be directly impacted. 90.7 FM, KLove, greatly impacts the area of Hampton Roads in the positive way. One of the biggest problems in our society today is the complete breakdown of morals and the family. 90.7 is one of the only stations in our area that provides commercial free broadcasting of family-friendly, encouraging music. If the LPFM stations are given priority, we will lose 90.7, KLove in this area. There would be an immediate negative impact to the Hampton Roads area. KLove operates on over 150 FM stations across the country, and have a listening base of over 2 million people nation-wide. If the LPFM stations are given priority treatment, many of these stations would have to stop operation. KLove makes a direct positive impact on the lives of millions of people every day. It is in the best interest of the entire nation for KLove to continue and, therefore, for the FCC to not give the LPFM stations priority treatment. Thank you for taking time to read my request and for not giving LPFM stations priority status.
